**C\_TSCM44\_65**

**SAP Certified Application Associate - Planning and GATP in SAP SCM APO 7.0 EhP1**

**80 Questions Exam – 61% Cut Score – Duration of 180 minutes**

# C\_TSCM44\_65 Practice Test

ERPPrep.com's C\_TSCM44\_65 PDF is a comprehensive compilation of questions and answers that have been developed by our team of SAP APO experts and experienced professionals. To prepare for the actual exam, all you need is to study the content of this exam questions. You can identify the weak area with our premium C\_TSCM44\_65 practice exams and help you to provide more focus on each syllabus topic covered. This method will help you to boost your confidence to pass the SAP APO certification with a better score.

## C\_TSCM44\_65 Questions and Answers Set

### Questions 1.

You use rules-based ATP. To influence the execution behavior of a rule, you want to set up a calculation profile and assign it to the rule. What can be controlled by the calculation profile?

Note: There are 2 correct answers to this question.

- a) Underdelivery
- b) Allowed delay
- c) Scope of check
- d) Substitution sequence
- e) Consumption limit

**answer: b, e**

### Questions 2.

What is the direct consequence of applying MRP type X0 to any given ECC material master?

Please choose the correct answer.

- a) The BOM is exploded in ECC. This ensures that all included components are planned as products in APO.
- b) The corresponding product is excluded from APO planning. Only the ECC BOM is exploded in APO.
- c) The material is excluded from ECC planning. Yet, a BOM explosion is carried out during ECC planning.
- d) The material is automatically included in APO planning. It is still possible to run operative MRP manually in ECC with a BOM explosion.

**answer: c**

**Questions 3.**

You allow lateness of 7 days within the dynamic pegging definition for a product. Planned order "123" is scheduled 4 days later than the sales order requirement. The quantity is correct. No other planning objects exist. No fixed pegging is applied. The planner expects only one time alert.

How do you configure the PP/DS alert monitor profile (requirement/receipt alerts) to reflect this situation?

Please choose the correct answer.

- a) Activate either "product too late (fixed pegging)" or "receipt due date violation (fixed pegging)".
- b) Activate "product too late (dynamic pegging)" and "receipt due date violation (dynamic pegging)".
- c) Activate "product too late (fixed pegging)" and "receipt due date violation (fixed pegging)".
- d) Activate either "product too late (dynamic pegging)" or "receipt due date violation (dynamic pegging)".

**answer: d**

**Questions 4.**

What do you need to do in order to use the preselection of suitable substitutions?

Please choose the correct answer.

- a) Activate the preselection in the checking mode and product location master data.
- b) Activate the preselection in the assignment of rule strategy and check instruction.
- c) Define the preselection in ECC and transfer it during order creation.
- d) Activate the preselection in the calculation profile of the rule.

**answer: b**

**Questions 5.**

Two PDS exist for a given product and are valid for the same lot size range.

PDS one has priority 1 with a duration of 3 weeks.

PDS two has priority 2 with a duration of 2 weeks.

Scheduling is set to backwards and reverse without negative offset. The requirement date of a sales order is in one week. What is the result when you run the standard lot heuristic?

Please choose the correct answer.

- a) The planned order is delayed using PDS two.
- b) No planned order is created.

- c) The planned order is delayed using PDS one.
- d) The planned order is scheduled in time and without source of supply.

**answer: a**

#### Questions 6.

Planned orders are scheduled in SNP with just one PDS for a product. How is the duration and end date of the order derived, if you plan in weekly buckets?

Note: There are 2 correct answers to this question.

- a) The end date of the order is not dependent on the planning bucket and can be controlled by the period factor.
- b) The duration of the order, which depends on the order quantity, is derived via lead time scheduling.
- c) The end date of the order is dependent on the planning bucket and can be controlled by the period factor for the SNP optimizer.
- d) The duration of the order, which does not depend on the order quantity, is derived via basic date scheduling.
- e) The end date of the order is dependent on the planning bucket and can be controlled by the period factor for the SNP heuristic.

**answer: d, e**

#### Questions 7.

Your customer uses the APO Core Interface with immediate BTE transfer of master data. Which of the following reports do you use in background processing for routine operation in the Core Interface?

Note: There are 3 correct answers to this question?

- a) RIMODGEN
- b) RIMODAC2
- c) RAPOKZFX
- d) RIMODACT
- e) RCPTRAN4

**answer: a, b, c**

#### Questions 8.

Your customer asks about the role of InfoProviders in the internal BW. Which of the following statements correctly describe features of an InfoProvider?

Note: There are 2 correct answers to this question.

- a) An InfoProvider is a BW object that can be used to create a query.
- b) An InfoProvider can be used to generate characteristic value combinations.
- c) All InfoProvider types can be used to store data.
- d) An InfoProvider can be defined as an InfoCube, DataStore object, MultiProvider, or PSA table.

**answer: a, b**

Questions 9.

Which SNP planning scenario is possible?

Please choose the correct answer.

- a) Scheduling with an accuracy of hours
- b) Capacity checking
- c) Make-to-order production
- d) Characteristics-based planning

**answer: b**

Questions 10.

What do you set up when implementing a DP scenario?

Please choose the correct answer.

- a) You assign characteristics from internal BW to the planning area.
- b) You define whether planning is done in weeks or months in the planning area.
- c) You define characteristic value combinations for the planning area.
- d) You create time series for the planning area.

**answer: d**

## Full Online Practice of C\_TSCM44\_65 Certification

ERPPREP.COM presents authentic, genuine and valid practice exams for SAP Oracle DB Certification, which is similar to actual exam. We promise 100% success in very first attempt. We recommend going ahead with our online practice exams to perform outstandingly in the actual exam. We suggest to identify your weak area from our premium practice exams and give more focus by doing practice with SAP system. You can continue this cycle till you achieve 100% with our practice exams. Our technique helps you to score better in the final C\_TSCM44\_65 exam.
